Klarweinstrasse 8c, 81247 Munich, Germany

Born 26.03.1964 | Austrian citizen

SUMMARY

Senior developer with knowledge of the currently common technologies in the area of Java development: Application Server, SpringBoot, REST, Eclipse/RCP, Maven, Subversion, Git, Jenkins, ...

My recent focus is on backend development for microservices with usage of the AWS cloud.

The well-founded experience in the development of large and long-lasting software projects helps me to define a practical architecture as well as the integration of suitable frameworks.

FREELANCE ACTIVITIES UNTIL TODAY

Essendi it GmbH

Senior Developer (07.2020 – today) part time

New design and development of a communication line between a bank and a tax office

Used technologies and tools: Java 11, Spring, Spring Boot, Webservices (WSDL/SOAP+REST), Cucumber, Selenium, html, js, Apache CXF, Maven, Bamboo, Docker, AWS (EC2)

Development process: Kanban

Otto GmbH: Further development of the Otto online platform

Senior Entwickler (05.2023 – 10.2023)

Development of personalized advertising spaces in the Otto web shop.

Fullstack-Development. The used process is Kanban with a team of ~ 15 persons.

Used technologies: Microservices, Kotlin, Spring, Spring Boot, Gradle, MongoDB, html, js, node, scss, AWS

Continuous Integration with AWS Code Pipeline and Github Actions

TUI GmbH

Senior Developer (03.2022 – 03.2023)

Development and operation of the component 'Search requests for hotel bookings' within a microservice-based overall architecture

Development: Java 17, Spring, Spring Boot, Gradle, Kafka, Kinesis, Cucumber, Swagger, Quarkus

DevOps: Docker, Kubernetes, Terraform, Continuous Integration mit Gitlab CI, DataDog

AWS Cloud: EC2, Lambda, ParameterStore, S3, Cloudwatch, SNS, SQS, DynamoDB, Redis, Aurora, Athena

Development process: Scrum

OTTO GmbH: Design and implementation of delivery address page

Senior Developer (09.2020 – 02.2022)

New design and implementation of the delivery address page for the online shop:

- Setup of the required microservice as an EC2 instance in the AWS cloud
- Implementation of the REST endpoints in the backend
- UX design
- Implementation of various tests: unit tests, ui tests, layout tests
- POC to optimize the usage of Mongo DB

Used technologies and tools: Scala, Spring, SpringBoot, Gradle, html, js, node, scss, Selenium, Backstop, AWS (EC2, S3, Cloudwatch, Cloudformation, SNS, SQS, Lambda, ..), Mongo DB, Kibana, Grafana

Development process: Scrum; Continuous Integration mit Jenkins

Loyalty Partner Solutions: Redesign of a test framework and backend development

Senior Developer (12.2018 – 04.2020)

Definition of the design and implementation of a test framework for the customer project Miles&More of Lufthansa with the following requirements:

- the mapping of current system and integration tests is possible
- All service interfaces of Miles&More can be accessed: SOAP, REST, EJB, DB
- the specific requirements for UI tests with selenium are covered
- Support of the QA team during tool introduction

Furthermore working in the backend development for Miles&More

Used technologies and tools: Weblogic, Oracle, Hibernate, aspectJ, SOAP, REST, Java 8, Java11, JavaFX, Kotlin, Oracle, JUnit5, Selenium, Git, IntelliJ

Development process: Scrum; Continuous Integration with Jenkins

AVL DiTEST: Development of a vehicle diagnostic system

Senior Developer (07.2016 – 12.2018)

Development of a vehicle diagnostic system for Jaguar/Landrover.

Used technologies: Java 8, Eclipse/RCP, Eclipse/EMF, JUnit, Mockito, Maven, Subversion

Development process: TDD; Scrum; Continuous Integration mit Jenkins

New development of a UI test suite for various enterprise projects based on Selenium

From 2018: Partial migration of the technology stack:

Source code migration from Subversion to Git with Bitbucket

Frontend migration to SpringBoot, REST, Swagger, React and Typescript

Siemens: Development of a hazard alarm system

Senior Developer (09.2011 – 04.2016)

Development of a hazard alarm system for buildings.

Used technologies: Java/J2EE, Eclipse/RCP, Eclipse/EMF, JBoss, Hibernate, JUnit, Mockito, Maven, Subversion

Development process: TDD; Scrum; Continuous Integration with Jenkins

Rohde&Schwarz: Software Defined Radio

Senior Developer (07.2009 – 08.2011)

Development of a system architecture for military radios.

Used technologies: VisualStudio, C++, CrossCompiler, ...

Rohde&Schwarz: Development of a GUI application

Software developer (07.2008 – 06.2009)

Refactoring of a GUI application to configure measuring devices.

Used technologies: C++, STL, QT, Perl, Enterprise Architect, PC-Lint, ClearCase.

Siemens/NSN: Mobile systems

Software developer and architect (01.2000 – 06.2008)

Development of a core component for a major project in the mobile systems sector.

Used technologies: C++, CORBA, Java, Eclipse RCP, Unittests, Scrum.

EMPLOYED ACTIVITIES UNTIL 2000

Siemens München: Mobile systems

Software developer and architect (03.1998 – 12.1999)

Development of a an Operating&Maintenance system in the mobile systems sector.

Technologies: C++, OOA/OOD, Design Pattern, CORBA, SUN Solaris.

Siemens Erlangen: Plant engineering

Software Developer (10.1995 – 02.1998)

Development of a framework for the process automation of hot rolling mills.

Technologies: C++, OOA/OOD, Design Pattern, CORBA, SUN Solaris.

Siemens Erlangen: Traffic engineering

Sales (12.1993 – 09.1995)

Sales activities and project management for Heavy Rails (i.e. metro systems) in China

Siemens Beijing: Concept development

Sales/Marketing (04.1993 – 11.1993)

Third station of an internal trainee program: Development of a concept to enter the Chinese paper industry market; sales activities.

Siemens Erlangen: Marketing

Marketing (09.1992 – 03.1993)

Second station of an internal trainee program: Participation in strategic marketing projects in the water management sector.

Siemens Fürth: Development of an AI control

Development (12.1991 – 08.1992)

First station of an internal trainee program: Development and integration of a neural network for a rolling mill.

Siemens Fürth: Development of an AI control

Development (11.1990 – 05.1991)

Development of a neural network for a rolling mill.

EDUCATION

Study of computer science

(11.1984 – 11.1990)

Studies of computer science with minor subject sinology at the Friedrich-Alexander University Erlangen; overall grade: 1.7

Languages

German: Mother language

English: fluent

Chinese (Mandarin): basic

CERTIFICATES

iSAQB Software Architecture – Foundation Level

(07.2020)

ISTQB Certified Tester Foundation

(05.2020)

AWS Certified Solutions Architect - Associate

(06.2019)

OMG Certified UML Professional Fundamental

(04.2008)

Munich, October 10th, 2023
